Office Action Summary

Art Unit: 1761

DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to a press for making a food patty, classified in class 425, subclass 298.
- II. Claims 15-17, drawn to method of forming a patty from food product using a food press, classified in class 426, subclass 513.

The inventions are distinct, each from the other because:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of Group I as claimed can be used to practice another and materially different process, e.g., for use in molding a non-edible malleable material such as putty or Play-Doh to form a shaped product.

Because these inventions are distinct for the reasons given above and the search required for Group I (apparatus) is not required for Group II (method), restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
